Turkey (2005)	0,2	1,7	1,7	2005

Generally, data from the EU Community Survey on household use of ICT, which covers EU countries plus Iceland, Norway and Turkey, relate to the first quarter of the reference year.

For the Czech Republic, data relate to the fourth quarter of the reference year.

For Korea: For 2000 to 2003, data included broadband access modes such as xDSL, cable and other fixed and wireless broadband via computers. As of 2004, data also included mobile phone access.

For Canada: Statistics for 2001 and every other year thereafter include the territories (Northwest Territories, Yukon Territory and Nunavut). For the even years, statistics include the 10 provinces only.

For Japan: Only broadband access via a computer.

For Luxembourg: For 2004, data include wireless access.

For Mexico: For 2001 and 2002, households with Internet access via cable. From 2004, households with Internet access via cable, ADSL or fixed wireless.

For Norway: For 2003, data include LAN (wireless or cable).
